	BILL OF QUANTITIES FOR REHABILITATION & SUBSTATION BALASTING LOT-A					
ITEM	DESCRIPTION	UNIT	QTY	UNIT RATE	AMOUNT	
NO.		UNIT		UNITIONE	AMOUNT	
110.	Preliminaries-For All substation sites in the Lot					
Α	Allow for a temporary site office prefarably portable that can	ITEM	1			
	be shifted to multiple site or external arrangement as per					
	contractor convinience(Works lasting only 4 months)					
В	Ditto but provide at his own risk and cost where directed on	ITEM	1			
	the site weatherproof lockup sheds for the safe storage and					
	custody of material for the Works and for the use of workmen					
	engaged thereon and shall remove such sheds and make					
	good damaged or disrupted surfaces upon completion to the					
	satisfaction of the Project Manager.					
С	Allow for clean water for the works	ITEM	1			
D	Allow for all the necessary statutory approvals for the works	ITEM	1			
Е	Allow for temporary sign post for the proposed works	ITEM	1			
F	The Contractor shall allow and be entirely responsible for the	ITEM	1			
	security of all the Works, stores, materials, plant, personnel,					
	etc, both his own and sub-contractors' and must provide all					
	necessary watching, lighting and other precautions as					
	necessary to ensure security against theft, loss or damage					
	and the protection of the public.					
G	Allow for Insurance Cover for the proposed works and					
	workers.					
Н	Allow for a qualified personel conservant with Kenya Power	ITEM	1			
	safety regulations for the entire contract period					
I	Allow communication appliances for PM/Project engineer and	ITEM	1			
	supervisor.allow provisional 700,000					
J	Allow for supply of power or provide for an adequate Capacity	ITEM	1			
	Generator on site for the supply of power for use for the					
	works.					
Κ	Allow for demobilization and relocation to different site	ITEM	1			
L	Allow for samples testing in accedited labaratories all material	ITEM	1			
	as per engineer request					
			ļ			
	TOTAL TO SUMMARY PAGE-PRELIMINARIES					

ITEM	DESCRIPTION	UNIT	QTY	UNIT RATE	AMOUNT
NO.					
KABAR	RNET 33/11KV SUBSTATION				
	SWITCHYARD				
А	Excavate oversite vegetable soil average depth of 300mm	SM	750		
	and cart way to Municipal Council designated damping site				
В	Supply and spread average 150mm thick selected well	SM	750		
	compacted imported and approved murram fill, compacted in				
	layers of 150mm thick using a plate/vibrating portable roller				
	compactor to receive ballast (ms) to gradual slope terminating				
	at storm drain				
С	Apply suitable and approved weed killer, herbicide to	SM	750		
	surfaces of backfill as per the Manufacture's written				
	instructions and a 12 month guarrantee and provide a copy to				
	client.				
D	1000 gauge polythene or other equal and approved	SM	750		
	membrane laid on compacted and treated surface with welted				
	laps of 200mm wide.				
Е	Supply and spread uniformly 150mm thick (30-40mm) crushed	SM	750		
	Agregates/ ballast in switchyard. (machine crushed)				
F	Provide concrete insitu channel 200x 200x275mm above	LM	200		
	switchyard level along the edges of invert drain block,road				
	edges to secure from falling ballast.				
	FENCING				
G	Construct 225mm thick substructure quarry natural stone wall	SM	200		
	and approved natural machine cut stone walling in				
	superstructure and reinforced with 20 SWG hoop iron in every				
	two alternating course.bedded and jointed in cement and				
	sand (1:3)mortar; maximum height 1.5m from strip foundation				
	to copping top(MS);including excavation, backfilling and				
	carting away surplus materials from site.				
			ļ		
Н	Ditto but stone piles/pillars at 3.0m intervals including	SM	100		
	construction joints at every 30.0m.				
I	150mm thick viibrated reinforced concrete class 25/20 (1:2:4)	CM	20		
	in 1 strip and pile foundations	014	<u> </u>		
J	Ditto but in throted copping; average 50mm thick and with	CM	4		
	both falls.	014	0.05		
K	15mm thick cement sand plaster (1:4) to walling to receive	SM	285		
	paint (ms)	014	005		
L	Prepare and apply two coats of premimium grade bituminous	SM	285		
	paint on wall plastered surfaces		<u> </u>		
N 4	Allow for slope protection on front face and any other on		4		
Μ	eclosed area with stone pitching after the wall with area not	ITEM	1		
	exceeding 200sqm				
Ν	Rehabililitate pit latrine by makiing dood,doors repairs	ITEM	1		
	inclusing splash areas and access steps to approved				
	usability,disludging if needed.				
	TOTAL TO SUMMARY PAGE 1				

ITEM	DESCRIPTION	UNIT	QTY	UNIT RATE	AMOUNT
NO.					
	Chainlink				
А	1.5m high x10A Gauge chain-link complete with 4mm	LM	145		
	diameter 3 strands of galvanized plain wire passing through				
	hole in the 2.0m high 75x50x1.5mm thick RHS,450mm				
	cranked posts (50No) placed at 3.0m centers, 3No. strands of				
	12Gauge barbed wire on 450mm cranks, including,				
	excavation and erection works, mortised in 1:3:6 mix mass				
	concrete surround 300mm deep, including				
	16N0.75x50x1.5mm thick RHS strut posts at approprite				
	locations; including priming and painting the steel posts with				
	supergloss premimium grade paint				
В	Fair face plain concrete insitu copping (1:3:6)mix, size;	СМ	7		
	200x75mm high to anchor and hold chain-link ion top of half				
	wall.				
	GATE				
С	Rehabilitate the 2No.existing gates by making good all areas	ITEM	1		
_	that need repair, repaint all to client satisfactory. This to				
	include functionality, closing latches ,gate column reifrorcenet				
	and repairs				
	CABLE TRENCHES & DUCTS				
D	Refurbish existig cable trenches by hacking 150mm and raise	LM	85		
	to 300mm above ground by lean concrete on the 150mm				
	walls and clearing the debris in trenches.				
E	Provide and put in place precast concrete trench covers size;	NO	215		
	900x400x75mm thick, reinfoced with T8 bars spaced at				
	100mm both ways with fair face finish on both side; concrete				
	to class 25				
F	Supply and lay 110mm diameter class 41 UPVC ducts to	LM	60		
	receive control cables running on the surface; and crossing				
	the access road, including excavation of trench, backfilling				
	and 100mm thick hounching on ducts sorrounds.				
	REFURBISHMENTS				
Α	Rehabilitate external painting ,gutters ,painting ,downpoples	ITEM	1		
	all metalic areas and splash aprons to building 16mx7m				
В	Rehabilitate guard house entirely on leaking roofs	ITEM	1		
	eaves,general painting doors lighting and all its external areas				
С	Alow to free working area by moving all kplc store material to	ITEM	1		
	designated point under kplc supervision				
D	Cart away the existing fence and store to designated location	ITEM	1		
	not greater thn 500m away				
	l m				
	(M. V.

NO.					
	STORM WATER DRAINAGE				
А	Excavate on site drain trench not exceeding 1.5m deep	CM	225		
	including plucking and struting, dispoasl of soil to receive				
	drainage channels and forming sloping sides in well				
	compacted murram bed.				
В	Lay (300x450mm) precast concrete invert block drains to a	LM	150		
	suitable fall with grooved edge and tounged joints filled with				
	cement/sand mortar (1:3) and laid on 50mm thick plain				
	concrete bed				
С	Supply and lay on sides of sloped trench (75x230mm wide)	LM	300		
	precast concrete slabs jointed in 1:3 cement sand mortar				
D	Fair face plain concrete strip (1:3:6)mix, size; 150x250mm high	CM	11		
	to on both side of drain including excavation and carting away				
	the excavated materials.				
	ACCESS ROAD				
Е	Supply and handpack hardcore, 300mm thick, well rammed	SM	230		
	and consolidated in 150mm thick layers in stripped access				
	road.				
F	Ditto but 50mm thick approved 3/8" clean ballast on access	SM	230		
	road survace				
G	250 x 125mm High pre-cast concrete kerb bedded and jointed	LM	120		
	in cement and sand (1:4) mortar including 325x100mm thick				
	mass concrete class 20/20 in foundation and haunching at				
	the back, all necessary formwork and excavations.				
Н	Repair and make good existing concrete paving blocks at the	ITEM	1		
	main gate entrance to Engineer's satisfactory.				
I	Construct 8.0m long open drain channel size; 450mm wide	ITEM	1		
	and 450mm deep, 150mm thick reinforced concrete walling				
	and base; including 63x63x4mm thick MS angle line				
	embedded in concrete with fish-tailed 12mm diameter x				
	125mm long MS inserts, in drain walling to recive steel				
	gratting (ms);				
J	D10 at 150mm centres both ways	KG	105		
К	Provide fabicated 8.0m long heavy duty grating; 450mm wide	ITEM	1		
	with 20mm ribbed bars welded in MS angle 63x63x4mm thick				
	frame at 50mm centres . Prpare and apply gloss primer and				
	two coats of 1st grade aluminium gloos paint.

NO.					
	Chainlink				
Α	1.5m high x10A Gauge chain-link complete with 4mm	LM	170		
	diameter 3 strands of galvanized plain wire passing through				
	hole in the 2.0m high 75x50x1.5mm thick RHS,450mm				
	cranked posts (63No) placed at 3.0m centers, 3No. strands of				
	12Gauge barbed wire on 450mm cranks, including,				
	excavation and erection works, mortised in 1:3:6 mix mass				
	concrete surround 300mm deep, including				
	16N0.75x50x1.5mm thick RHS strut posts at approprite				
	locations; including priming and painting the steel posts with				
	supergloss premimium grade paint				
В	Fair face plain concrete insitu copping (1:3:6)mix, size;	CM	9		
	200x75mm high to anchor and hold chain-link on top of half				
	wall.				
	Gate				
С	Fabricate and fix a primary substation gate as per the	NO	1		
	provided drawing SK.No,07044/B				
D	Excavate gate pillar bases commencing from reduced levels	CM	4		
	and cart away the spoil.				
	Ditto but over 1.5m deep but not exceeding 3.0m deep.	CM	1		
E	Plain concrete (1:4:8-20mm aggregates) in 50mm thick	SM	2		
	blinding for gate column bases.				
F	Vibrated reinforced concrete class (1:2:4/25) for gate column	CM	1		
	bases	-			
G	Ditto but 400x400mm gate columns.	CM	1		
H	Fair face formwork to vertical sides of the columns	SM	10		
	High yield mild steel reinforcement 8mm and 16mm bars	KG	225		
	including cutting, bending, spacers, tying wire and fixing to BS				
	4449 in, column bases and columns				
<u> </u>	CABLE TRENCHES & DUCTS				
J	Refurbish existig cable trenches by hacking 150mm and raise	LM	85		
J	to 300mm above ground by lean concrete on the 150mm		05		
	walls and clearing the debris in trenches.				
к	Provide and put in place precast concrete trench covers size;	NO	300		
	900x300x75mm thick, reinfoced with T8 bars spaced at		000		
	100mm both ways with fair face finish on both side; concrete				
	to class 25				
L	Supply and lay 110mm diameter class 41 UPVC ducts to	LM	90		
	receive control cables running on the surface; including		30		
	excavation of trench, backfilling and 100mm thick hounching				
<u> </u>	on ducts sorrounds. Allow to cart away existing fence ,gate and handover				
М		ITEM	1
